The Biocatalysis and Structural and Evolutionary Biology groups within the Department of Microbiology and Biochemistry (University of the Free State, South Africa) are looking for a Post-doctoral candidate interested in bio-catalysis and structural biology.

We are interested in understanding the structure-function relationship of various biocatalysts in oxyfunctionalization reactions.

We are looking for highly motivated and enthusiastic candidates with a background in biochemistry, enzymology, biotechnology, or related fields and with an interest in biocatalysis and structural biology. Previous experience in molecular biology, protein purification and enzyme characterization is desired. Knowledge and experience in X-ray crystallography will be advantageous. We offer close supervision in a stimulating and interdisciplinary atmosphere.

Applicants should hold a PhD degree conferred no more than 3 years ago. Applications should include a cover letter with a statement of your research interests, CV and the names and contact details of two references. Successful candidates will be required to start as soon as possible. Please apply via e-mail to Prof. Dirk Opperman at opperdj@ufs.ac.za or Prof. Martie Smit at smitms@ufs.ac.za
